Phung Quoc Viet

Software Engineer

(+84) 369 114 668 rexviet@gmail.com Ho Chi Minh City, Vietnam

OBJECTIVE

To contribute my Back-end, system, and DevOps skills and experience in a solid company, and become a good Solution Architect in future.

SUMMARY

I am good at System Design, can build a distributed microservices system from scratch, with many microservices design patterns: CQRS, Outbox Transactional, Event Driven. Throughout my career, I have worked on a variety of projects ranging from Web 2 SaaS to Web3 short videos application, NFT Games, DEX,... which has allowed me to develop a deep understanding of the backend development process. I am experienced in NodeJS (Express, NestJS), AWS, DevOps skills, and have a proven track record of building robust and scalable backend systems.

EDUCATION

University of Information Techbnology 09/2013 - 12/2016

Information Technology

WORK EXPERIENCE

Pandora Digital 12/2022 - 01/2024

Backend Leader

- Responsible and makes decisions about system design, codebase design
- Build POC to demonstrate the feasibility of the solutions
- Estimate infrastructure cost
- Setup CI/CD flows
- Design and develop microservices system from scratch
- Mentoring and review code for members
- Co-op with Project Owner to manage project progress
- Manage AWS resources

Pandora Digital 12/2021 - 12/2022

Backend Developer, DevOps Engineer

- Practicipate in system design, codebase design
- Build POC to demonstrate the feasibility of the solutions
- Maintain and develop new features for current project (Decentralized exchange with highest TVL $58.11M)
- Sync data from blockchain to database
- Work closely with SA and team leaders to enhance CI/CD flows and manage cloud resources (Azure)

Everfit 02/2020 - 03/2022

Backend Leader, DevOps Engineer

- Responsible for system design, codebase design
- Maintain and develop new features for current project
- Design and develop microservices system
- Mantain and develop CI/CD flows
- Mentoring and review code for members
- Work closely with Tech Lead and C-Levels to manage and optimize cost for Cloud Resources (Save 25% cost for company)

Synova Solutions 08/2018 - 12/2019

Backend Developer, DevOps Engineer

- Design and develop RESTful API, Socket API
- Setup and config servers for environments: Develop, Testing, Staging, Production
- Dockerization environments for team members working
- Setup CI/CD flows

Tesse 12/2016 - 08/2018

Backend Developer, DevOps Engineer

- Practicipate in system design, codebase design
- Develop RESTful API, Socket API, write unit tests and documents
- Load balancing, scaling system
- Responsible for scaling out system to serve a spike of 300,000 active users

FEATURED PROJECTS

TingMe

12/2022 - 01/2024

Technical Leader

Company: Pandora Digital
Team size: 10
Technology description:
NodeJS (NestJS), Postgres, MongoDB, Redis, Elasticsearch, Docker, Kubernetes, Github Actions, Terraform, AWS (EC2, VPC, Network Load Balancer, S3, SNS, SQS, EventBridge, MediaConvert)

- Responsible and makes decisions about system design, codebase design
- Build POC to demonstrate the feasibility of the solutions
- Estimate infrastructure cost
- Setup CI/CD flows
- Design and develop microservices system from scratch
- Support and guide and review code for members
- Co-op with Project Owner to manage project progress
- Manage AWS resources

Pandora

12/2021 - 12/2022

Backend Developer

Company: Pandora Digital
Team size: 15
Technology description:
NodeJS (NestJS), Postgres, GraphNode, Redis, Azure App Service

- Practicipate in system design, codebase design
- Build POC to demonstrate the feasibility of the solutions
- Maintain and develop new features for current project (DEX exchange)
- Sync data from blockchain to database
- Maintenance and enhance CI/CD flows
- Design and develop microservices system

Plant vs Undead

12/2021 - 06/2022

Freelance Backend Developer

Company: Uptivistic
Team size: 20
Technology description:
NodeJS, SocketIO, MongoDB, Redis, GraphNode, Terraform, Jenkins, AWS (ECS, ECR, S3, SNS, SQS, EventBridge)

- Maintain and develop new features for current project
- Sync data from blockchain to database
- Design and develop microservices system

Everfit

02/2020 - 03/2022

Backend Leader

Company: Everfit
Team size: 10
Technology description:
NodeJS, SocketIO, MongoDB, Redis, Stripe, Jenkins, Docker Swarm, AWS (ECR, EC2, S3, SNS, SQS, EventBridge)

- Practicipate in system design, codebase design
- Build POC to demonstrate the feasibility of the solutions
- Maintain and develop new features for current project
- Design and develop microservices system
- Mantain and develop CI/CD flows
- Support and guide and review code for members

SKILLS

Programing Language	NodeJS, Typescript
RDBMS	PostgreSQL, MySQL
NoSQL	MongoDB, Redis, DynamoDB
Search Engine	Elasticsearch
Microservices	gRPC, Topic - Queue, Outbox Pattern, Serverless
DevOps	Docker, AWS, CI/CD with Jenkins, Ansible, Terraform, Cloudformation
Linux	Config SSL. Load balancing with vertical scaling, horizontal scaling. Bash scripting
